

PARTNER WITH COMPASS for kids

“The customized professional development and parenting education that was provided left participants with new insights and suggestions for immediate implementation.”

Professional Development Training - Value and Impact

- ▶ Maximize your resources with professional development that inspires and empowers your staff and tangibly impacts your program.
- ▶ Decrease stress for management and staff by providing relevant training - right at your site and at a time that is convenient – to equip teachers and administrators with the knowledge and tools they need to do their best and improve outcomes for children.

COMPASS for kids works with you to develop training that improves skills and transforms perspectives. We will design training that:

- Is tailored specifically to your needs and goals
- Aligns with state and national guidelines and standards
- Provides staff with strategies to help them apply their learning to their practice

COMPASS for kids provides staff development in a variety of models, each tailored to the unique needs of adult learners:

- CEU courses
- Workshops and workshop series
- Classroom observation and feedback
- Book/discussion groups
- Training for specific professionals (e.g. Lead Teachers, Infant/Toddler staff, etc.)
- Conferences

Parenting Education – Supporting Parents and Children

- ▶ Educators and parents are inextricably linked as key adults in the lives of children. Parent involvement is a significant factor in program quality.

COMPASS for kids works with schools or directly with parent groups to provide parenting programs that:

- Provide information and skills
- Support strong school-home partnerships
- Address specific parenting needs (e.g. parents of toddlers, parents of children with identified needs, etc.)

Partner with us to design training for a workshop, a day, a year, or for a multi-year plan. We look forward to working with you to make sure that the adults who matter most to children - early childhood and school-age educators and parents - have all the tools they need to do the best job they can!
